

eMANAGER

Taking control of your web applications from one site

eManager provides an administrative web interface to the functions that allow you and your customer to manage access to the TRAVERSE eBusiness applications. eManager handles the overall security for the applications, including menu access and new user setup. It allows you and your customer to set up logins and permissions that determine a user's access to account information, inventory information, and order entry. Because eManager is integrated with TRAVERSE Accounting Software, you can leverage the power of the TRAVERSE administrative functions.

Establish and restrict access to left menu functionality for specific groups and users.

900 Wind River Lane, Suite 102, Gaithersburg, MD 20878
Phone 1-800-451-7447 or visit www.osasonline.com

Key Features and Benefits

- You assign one "administrator" login to your customer; the administrator can then log in to the system and add their own users
- Administrator has the flexibility to restrict other users to certain menu items
- Users can be categorized into "groups" when logins are assigned so that all members of a particular "group" can access the same information and functionality within the eBusiness applications

Architecture Highlights

Multi-tiered architecture utilizing:

- Microsoft Windows 2000 Server
- Microsoft SQL Server
- Microsoft IIS
- Encrypted security where appropriate
- Flexible database structure
- Multi browser support
- Multilingual
- Scalable architecture
- Customizable

Installation Options

- Hosted in a data center
- Single database - support is fully integrated to TRAVERSE accounting applications
- Purchase or lease finance options
- Multi-database support for added security between Internet and back office systems
